Gender Equity Readiness Scorecard (GERS) for hyperlocal companies

August 2025

Objectives and context

- **Objectives:** This tool is designed to score hyperlocal companies on their performance on gender equity, and identify areas of improvement
- **Context:** This tool
 - Is designed to be used by either the enterprises themselves or by independent evaluators
 - Is recommended to be used annually/ bi-annually to track progress
 - Has been designed to evaluate an entire enterprise, and not just one dark store in the enterprise or one city of operation
 - Does not include scores on parameters mandated by law (e.g., maternity leave)
 - Can be used effectively by a medium or large enterprise¹

1. An enterprise with investment exceeding ₹25 crore or annual turnover above ₹100 crore (Source: [Ministry of MSME](#))

How to use this tool

Whom to interview to score the organization

- Interview someone in the corporate team who has data on all DPs and dark stores, and information about key HR policies
- Ideally interview the HR Head of the enterprise, but in some cases, you could also interview the CEO (for medium enterprises) or senior HR manager (for large enterprises)

How to score the organization

- For each parameter, move to the next column only if there is a tick in the current column (starting with Score 1). This means:
 - If all conditions mentioned in Score 1 are met, give a tick in that cell
 - If there is no tick in Score 1, stop scoring the parameter and move to the next parameter
 - If there is a tick in Score 1 and all conditions mentioned in Score 2 are met, tick Score 2 column
 - If there is a tick in Score 1 and all conditions mentioned in Score 2 are not met, stop scoring the parameter and move to the next parameter
- Ask all questions related to one parameter and then write the column number where you made the last tick, multiplied by the multiplier number if any, in the “Final score” column. For example,
 - If for the parameter “Safety mechanisms”, the last tick is on Score 3, write 3 in the “Final score”
 - If you have not given any ticks for the parameter, write 0 in the “Final score”
 - If for the parameter “Women employees”, the last tick is on Score 3 and multiplier is 2, write 6 (=3x2) in the “Final score”
- Continue the scoring in a similar manner for other parameters
- Add the “Final score” across all parameters to calculate the total score
